RÉSUMÉ

Daryll Gomas

AI Solutions · Automation · Infrastructure + AI Integration

Portland, OR · Remote-first

daryll.gomas@gmail.com · daryllgomas.com

25+ years in IT infrastructure, now building with AI. Deep infrastructure knowledge (Microsoft 365, networking, security, virtualization) combined with hands-on AI development: Python, the Claude API, MCP and local LLMs. I design and run multi-agent research systems, automated security scanning and AI-powered data pipelines, mostly by voice.

CORE SKILLS

AI & automation

- Claude API, Anthropic SDK, MCP
- Multi-agent design and orchestration
- Local LLMs on NVIDIA GPUs (Ollama, Docker)
- Python automation and data pipelines
- Voice-first, hands-free workflows

Infrastructure

- Microsoft 365 / Entra ID, Conditional Access, MFA
- Networks, firewalls, VLANs, VPN
- Hyper-V virtualization, Windows Server, AD/DNS/DHCP
- NAS backup and disaster recovery
- Mac & Windows fleet management

Security & compliance

- Automated vulnerability scanning with AI summaries
- PCI DSS, HIPAA and cyber-insurance mapping
- Pen test & cyber defense experience
- HIPAA environments: medical and dental

Development

- Python, Bash, PowerShell, JavaScript, SQL
- HTML/CSS/JS dashboards and 3D web
- Docker, Ansible, Git
- Pine Script / ThinkScript indicators

EXPERIENCE

Principal Consultant · AI Solutions — BigPic Solutions

MAY 2025 – PRESENT · PORTLAND, OR (REMOTE)

- Built a multi-agent equity research framework with composite scoring and automated reports
- Built an AI sentiment pipeline over social and news feeds, using local LLMs on my own GPUs
- Built an automated security assessment toolchain: scan, report, remediate, with AI executive summaries and compliance mapping
- Microsoft 365 / Entra hardening, network segmentation and NAS backup for small businesses

IT Field Engineer — MacForce (Launch Technologies)

FEB 2023 – MAY 2025 · PORTLAND, OR

- Microsoft 365 and Entra ID administration, Conditional Access, SSO, migrations
- Hybrid Apple and Windows fleets; on-site assessments, firewalls, VPN and NAS backups
- Client consulting with documented 30–60% cost reduction through SaaS audits

Earlier

2014 – 2023	BigPic Solutions: founded in Buffalo, NY; networks, repair and IT consulting, then Portland
2018 – 2020	DenTech LLC: IT field technician for medical and dental practices (HIPAA)
2012 – 2013	Felines Pride: manager; technology, operations and web
2011 – 2012	TransWorld Network: ISP network operations center technician
2002 – 2011	Knight Enterprises: field services engineer, county lead for network deployments
2000 – 2002	Time Warner Cable: level 3 support and escalation lead

SELECTED PROJECTS

Multi-agent research system

- Seven-dimension composite scoring, agent orchestration, automated reports

Security scanning platform

- Scan, report, remediate; AI summaries; YAML compliance frameworks; Ansible fixes

Network & systems build-out

- Virtualized servers, segmented network, observability, verified backups, run by AI agents

Games and public tools

- Browser games, Town Hall and Swarm AI, built mostly by voice with AI

TRAINING

- Microsoft 365 / Entra ID administration (hands-on production)
- Pen test & cyber defense experience
- AI systems architecture (self-directed: Claude API, MCP, local LLMs, multi-agent design)
